

Modular Cleanroom Wall Systems

- ⇒ The ESC - Modular Cleanroom Wall System will assist you in creating clean facilities that are cost effective, easier to install, renovate or relocate.
- ⇒ Today's manufacturing Cleanrooms must respond to rapid market life cycles and ongoing product development. The ability to respond quickly to changing manufacturing demands is essential.
- ⇒ The ESC - Modular Cleanroom Wall System is designed to provide this flexibility and to adapt to constantly changing requirements, from expansion to retooling an entire space.
- ⇒ The wall panels can be various styles, a double layer prefinished white Aluminum sheet with a Polystyrene or Aluminum core, Vinyl covered Drywall or a combination of these panels.
- ⇒ The modular wall system uses extruded Aluminum components. The standard finish is a brushed Aluminum, with optional powder coating available for almost any colour. The system uses four basic profiles, (a top/bottom track, a post stud 8' to 26'), inside and outside corners, a plastic window glazing profile, a door frame, a flat cover, and two batten styles (on friction fit & one screw on).
- ⇒ Doors are Aluminum (Full, 1/2 or no glazing) Single or Double width, or fully automated sliding doors.
